### Dear Member/Attendee,

The **New England Dermatological Society** invites you to attend our upcoming clinical meeting jointly provided by the Rhode Island Hospital and the New England Dermatological Society. This meeting is hosted by the UMass Chan Medical School, Department of Dermatology, and will be held on **Saturday, April 6, 2024**.

This will be a *live* meeting and a great opportunity to view 22 unique and interesting clinical cases. We anticipate 200+ dermatologists and dermatologists-in-training to attend. Come see some patients, participate in case discussions, and mingle with colleagues.

In addition, please save the dates for upcoming New England Dermatological Society meetings. We look forward to seeing you in Worcester!

Sincerely,

Gabriela Cobos, MD  
Secretary, New England Dermatological Society

### Accreditation Statement

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through joint providership of Rhode Island Hospital and the New England Dermatological Society. Rhode Island Hospital is accredited by the ACCME to provide continuing medical education for physicians.

### AMA Credit Designation Statement

Rhode Island Hospital designates this live activity for a maximum of *4.25 AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

### As a result of participating in this activity, learners will be able to:

1. Describe a dermatologist-oriented approach to managing acute and chronic HS pain.
2. Identify 2–3 critical unmet needs of HS patients and the vital role for surgery in treating recurrent HS nodules and tunnels.
3. Regarding new knowledge gained with new EB therapies, identify when it is appropriate to recommend treatment and to refer to a researching institution.
4. Apply the International Society of Cutaneous Lymphoma's algorithm for the diagnosis of early mycosis fungoides. Use the algorithm as a framework for ordering and interpreting T-cell gene rearrangement studies.
5. Describe utility of more advanced technologies (high-throughput T-cell gene rearrangement studies, next-generation sequencing [NGS] panels) in the diagnosis of CTCL.
